

Woodstock, IL - The McHenry County Emergency Telephone System Board is pleased to announce the implementation of the innovative public safety service, **Smart911**.

Smart911 is a service that allows McHenry County residents, employees, and visitors, to provide vital personal and medical information about themselves and family members, via a self-registration portal. Registration of your **Smart911 Safety Profile** is free, private, and secure.

Your Smart911 Safety Profile is private and secure, and only available to the 9-1-1 center when a 9-1-1 call is placed from your registered phone number.

Smart911 is a national database, which means the **Smart911** Safety Profile you create will be immediately available to McHenry County 9-1-1 centers, and to any of the participating 9-1-1 centers across the United States.

Every household has different needs, and **Smart911** allows you to customize your Safety Profile to your household. Additional information can help responders better understand who may be in need of assistance, where they are located, and gauge their response accordingly. **You** decide how much or how little information is provided.

Register today at <https://www.smart911.com/>
